OUR PHILOSOPHY

“Life Well Lived” is our mantra to go and do and be anything but complacent. Be a tourist. Be a runner. Be an explorer. Be edgy. Be yourself. The one thing you won’t be is uncomfortable. The MBT® SensorTechnology™ promotes a soft heel landing, absorbing shock and cushioning your feet as if walking on soft sand. The Pivot Axis of our rocker bottom soles increase lower limb muscle activity and constantly engage your body, creating a natural instability that instinctively moves you comfortably forward. That helps you take everything in stride and gives you that extra little boost to live life to its fullest. Live it well in MBT®.

OUR INNOVATIVE SPIRIT

With a strong science and innovation foundation, MBT® has a unique approach that understands the human benefits of health, wellness and staying on the move. We know our consumers have realistic health and fitness ambitions. They want to maintain a healthy lifestyle which enables them to live and love life to the fullest. MBT® shoes are made for journeys. For the road less traveled. For blazing new trails. For the new restaurant down the street. They’re the perfect shoes for everyday adventures and those who want to get the most out of every step they take.

RUNNING

CORE FEATURES

ADVANCED TECHNOLOGY

MIDSOLE

MBT running footwear offers various midsole profiles with cushioning and support suited to the runner's needs.

SENORTECHNOLOGY™ 1

The MBT® SensorTechnology™ in the heel complements the midfoot sensor by absorbing shock.

ROCKER SOLE

MBT's unique running specific rocker sole shape enhances the transition into your next step.

PIVOTSTRIKE

MBT's innovative PivotStrike area provides runners with the ideal foot striking platform to transition into propulsion while enhancing support and cushioning.

SENORTECHNOLOGY™ 2

The MBT® SensorTechnology™ promotes a soft midfoot landing and absorbs harmful shock and works with the heel sensor.

ADDITIONAL COLLECTION FEATURES:

- Injection Molding Heel Counter for increased strength and support
- Engineered air mesh upper for breathability and comfort
- Drylex 360° Moisture Management System on collar and tongue lining

3 RUNNING PROFILES

LIGHTWEIGHT/FAST

For your short to medium distance runs that require a lightweight, low profile shoe with minimal rocking

ENDURANCE

For your longer distance walks or runs requiring added cushioning and improved midfoot-forefoot transition

X-CUSHIONING

For your fitness walking, training or recovery runs where maximum cushioning or that ultimate soft feel is key

COMFORT LIFESTYLE

PATENTED CURVED SOLE

The curved sole is comprised of five key components that together promote the gentle rolling motion experienced while wearing MBT® shoes. It is the combination of these specific components which make MBT® shoes truly unique and original.

1. CONTOURED POLYURETHANE INSOLE
BASF PU insole for excellent comfort.

2. MULTI-FUNCTIONAL LASTING BOARD
The lasting board and the engineered shank combine to form one section. This is produced from the fusion injected dual density TPU, specially developed for the MBT® sole construction which provides comfort and support.

3. MIDSOLE WITH PIVOT AXIS
The unique and functional part of the midsole is the Pivot Axis underneath the midfoot, which promotes active rolling movement with every step. (Fig. 2)

4. MBT® SENSORTECHNOLOGY™
The soft MBT® Sensor produces what has been described as a pleasant and natural feeling, reminiscent of walking on a sandy beach. (Fig. 1)

5. OUTSOLE
Made from premium, non-marking and durable rubber compounds, the flexible rubber outsoles of MBT® shoes have been designed to give enhanced traction on various surfaces.

MBT 1997 LEATHER

MBT® SOLE TECHNOLOGY

MBT® INDEX

Fig. 1

MBT® SensorTechnology™ promotes soft heel landing.

Fig. 2

Pivot Axis promotes rolling movement with every step.

Activate

Features a low level of rock due to the flattest MBT® sole construction, with lower sidewalls for greater activation and a low Pivot Axis.

Dynamic

Offers a moderate level of rock due to a medium-strong sole curve, Pivot Axis and medium-high midsole.

Performance

Generates an increased level of rock due to its strong sole curve and Pivot Axis for increased activation.
